<https://linkedin.com/in/mashaan>

I am a machine learning researcher, working on graph clustering and deep learning problems. Previously, I held academic positions in an Australian institute and a Saudi university. I designed material for computer science at masters and undergraduate levels.

EDUCATION

Doctor of Philosophy - PhD, Computer Science , <i>The University of Sydney</i> , Thesis title: " Graph Filtering and Automatic Parameter Selection for Efficient Spectral Clustering ."	2017 — 2021
Master of Science, Computer Science , <i>King Fahd University of Petroleum and Minerals (KFUPM)</i> , Thesis title: " Human In-Place Action Recognition using Combination of Kinect Data Streams ."	2013 — 2016
Bachelor of Science, Computer Science , <i>University of Hail</i> ,	2005 — 2010

SKILLS

Research & Development	Authored +15 research papers .
Communication	English (fluent), Arabic (native).
Technical	Python and Java programming, Python's ML libraries (scikit-learn, pytorch, seaborn), manim
Curriculum design	Experience in designing computer science and data science courses according to Australian Qualifications Framework (AQF) and Saudi Arabia's NCAAA.

PROFESSIONAL EXPERIENCE

CURRICULUM DEVELOPMENT COLLABORATOR <i>Sydney Polytechnic Institute</i> <ul style="list-style-type: none">Participated in curriculum development for a Master of Data Science and Bachelor of Computing.Designed the outline and planner documents for courses: Database Systems (U211), Cybersecurity and Information Assurance (U312), and Full-stack development (U322).	Jul 2023 — Present <i>Sydney, Australia</i>
MACHINE LEARNING RESEARCHER <i>Freelance</i> <ul style="list-style-type: none">Working on machine learning research with researchers from the University of Sydney and KFUPM.Our research focuses on Graph Convolutional Network (GCN) and Unsupervised Domain Adaptation (UDA).Designed experiments using python ML libraries (scikit-learn, pytorch, seaborn, and others).	JUN 2022 — Present <i>Riyadh, Saudi Arabia</i>
ASSISTANT PROFESSOR <i>University of Hail</i> <ul style="list-style-type: none">Participated in curriculum design and lecturing for multiple graduate and undergraduate computer science courses.Adapted new teaching strategies to teach the following courses: data structures (ICS202), advanced database (ICS434), and machine learning for big data (CSAI510).	JAN 2021 — JUN 2022 <i>Hail, Saudi Arabia</i>
CURRICULUM DEVELOPMENT COLLABORATOR <i>Sydney Polytechnic Institute</i> <ul style="list-style-type: none">Participated in curriculum development for a Master of Data Science.Designed lecture slides, assignments, practical sessions, and exams for courses: Database Systems and Infrastructure (MDS604), Mathematics for data science (MDS602), and Artificial Intelligence and Innovation (MDS607).	SEP 2020 — MAR 2021 <i>Sydney, Australia</i>
SYSTEM ENGINEER <i>SABIC</i> <ul style="list-style-type: none">In charge of securing and maintaining the plant network components.Upgraded obsolete network components during online operation.	AUG 2010 — MAY 2012 <i>Jubail, Saudi Arabia</i>
INTERN <i>Saudi Aramco</i> <ul style="list-style-type: none">Completed cooperative training at EXPEC ARC as a member of Computational Modeling Team.Developed a GUI interface populating the simulator output, large text files, into a database.	JUN 2009 — JAN 2010 <i>Dhahran, Saudi Arabia</i>

SELECTED GITHUB PROJECTS

[VisionTransformer-MNIST](#)

ViT, *pytorch*, *Jupyter Notebook*

- Implementation of the paper “*An Image is Worth 16x16 Words: Transformers for Image Recognition at Scale*”, which was published by Google research.
- Vision transformers replaces CNNs as the preferred method for image classification.

[ADDA](#)

GANs, *pytorch*, *Jupyter Notebook*

- Implementation of the paper “*Adversarial Discriminative Domain Adaptation*”, which was published in CVPR2017.
- ADDA uses GANs to perform unsupervised domain adaptation (UDA).

[python-tutorials](#)

python, *scikit-learn*, *Jupyter Notebook*

- A collection of notebooks on vectorization and graphs in python.
- Vectorization refers to the style of coding where operations are applied to the whole array instead of individual elements.

[manim](#)

python, *manim*

- Manim is a python library to animate technical concepts.
- I used manim to visualize the behavior of some numpy and pytorch functions.

SELECTED PUBLICATIONS

- [Mashaan Alshammari](#), John Stavrakakis, Adel F. Ahmed, Masahiro Takatsuka: “*Graph Construction using Principal Axis Trees for Simple Graph Convolution.*”, **arXiv**:2302.12000, 2023.
